GENERAL DESCRIPTION

I have thorough knowledge, understanding, and experience in product design, involving extensive development from concept to prototype design. I am capable of supporting all aspects of a projects life and have the skill and experience to implement proper engineering procedures, with an emphasis on time-to-market.

TYPICAL CHARACTERISTICS

I have a very diverse background that enables me to wear many hats. My love of technology allows me to enjoy any level of the work load; from product concept to design to field support.

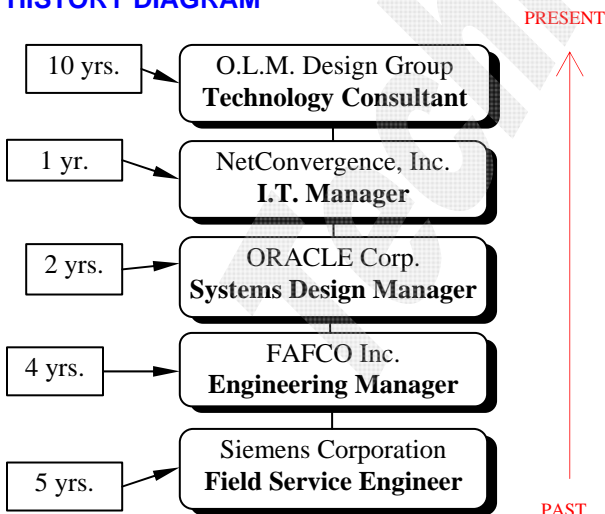

I feel my forte' is having an extremely creative mind. I am also a clear, logical thinker who can see the big-picture, and have a talent for quick learning. My verbal and written communications are excellent, and I am a self-starting, self-sufficient worker able to perform or lead in a team environment.

I have experience in international travel, management, graphic arts, chemistry, authoring, drafting, video/gaming machine design, packaging, prototyping, patent applications, & marketing research.
